SCOPE

The Winterschool will provide a platform for reviewing and discussing new developments in the field of electronic properties of molecular nanostructures and their applications.

Subjects included are:

- Carbon nanotubes growth and selection
- Carbon nanotube optics and electronics
- Carbon nanotube spectroscopy
- Molecular nanostructure transport and spintronics
- Theory of molecular nanostructures
- Applications of molecular nanostructures
- Molecular nanostructure composites
- Molecular machines and molecular motors
- Template grown molecular nanomaterials
- Single molecule experiments

Theoretical and experimental contributions from research work in this new field of material science are welcome.

A special workshop will be arranged on requirements and requests for the application of molecular nanostructures from the point of view of industry.

TIME AND LOCATION

The winterschool will be conducted from

March 4 to March 11, 2006

at the HOTEL SONNALP in Kirchberg / Tirol, Austria.

All participants of the winterschool will be accommodated in the hotel or in nearby private houses.

Dinner will be served for all participants at the hotel. The Hotel Sonnalp is a modern, Tyrolean style building with a very cosy atmosphere, a big lecture room and several special installations like indoor swimming pool, sauna, solarium, etc. for your recreation.

SOME FURTHER INFORMATION

Tutorial and research lectures and poster presentation will be scheduled for morning and evening sessions. The afternoon will be free for mini workshops, special tutorials, and private discussions.

A second announcement will be distributed to interested colleagues in October 2005. Personal application for participation will be required. Current information will be in the internet at:
