## Scope

---

The Winterschool will provide a platform for reviewing and discussing new developments in the field of electronic properties of molecular nanostructures and their applications.

Subjects included are:

- **Materials science of graphene and nanographene**
- **Carbon nanotube optics and electronics**
- **Carbon nanotube growth and selection**
- **Single-molecule experiments**
- **Applications of molecular nanostructures**
- **Theory of molecular nanostructures**
- **Biomolecule physics and applications**
- **Nanostructure spintronics**

Theoretical and experimental contributions from research work in this new field of materials science are welcome.

## Time and Location

---

The winterschool will be conducted from
